DISCOVERY DOME

Full Immersion Digital Movie Dome and Stellarium

814-262-0732

www.thelearninglamp.org

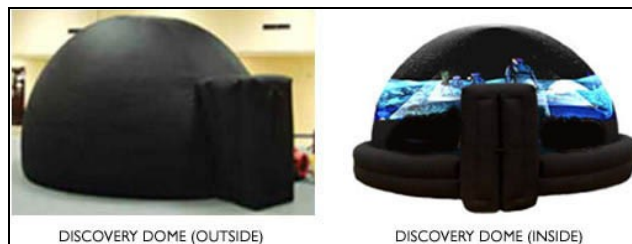

Did you know?

64 percent of Pennsylvania high school students enter 12th grade without the science skills necessary to compete in our high-tech global economy.

Discovery Dome

Get your students excited about science with Discovery Dome! The Learning Lamp's newest teaching tool, Discovery Dome is a full immersion digital movie dome and portable planetarium that comes to you. Engaging high definition full-dome movies take students on a multi-sensory journey exploring the earth, the universe, and the edge of the solar system. This fast-paced, high-tech approach engages all types of learners.

Discovery Dome is an affordable alternative to field trips. It can comfortably hold 30 second-grade students and presents museum-quality, full-dome shows in stereo sound—filling nearly 360 degrees of the dome with sharp, vivid images. This partnering of education with the latest visual and audio technology is a perfect fit for today's tech savvy students. You have to see it to believe it!

Details:

Discovery Dome must be used indoors and requires a 25 square feet of open floor space with a 12 foot ceiling. The rates for a presentation at your school are:

- **\$350—half day—3 hours of programming (up to 4 classes/shows)**
- **\$450—full day—5 hours of programming (up to 8 classes/shows)**
- **\$100—one show**

For any location over 20 miles roundtrip from our Richland location, an additional charge of 50 cents per mile applies.
