The Zula Patrol: Under the Weather – The Zula Patrol and their loyal pet Gorga are gathering samples of weather for scientist Multo's research. When the Zula gang accidentally hurts Gorga's feelings, he leaves planet Zula to find a new home. Interplanetary villain Dark Truder then tricks Gorga into stealing weather from other planets so he can become ruler of the Universe. Based on the award-winning PBS TV series. 24 minutes, Grades K – 2.

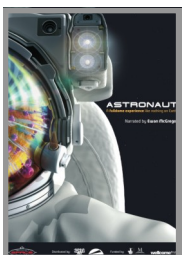

Dawn of the Space Age – Re-live the excitement of the early days of space exploration, from the launch of the first artificial satellite Sputnik, to the magnificent lunar landings and privately operated space flights. Be immersed and overwhelmed with this most accurate historic reconstruction of man's first steps into space. Who were the men and women who took part in these death-defying days? Witness their drive, their passion, and their perseverance to explore in *Dawn of the Space Age*. 30 minutes, Grades 5 and up ** Brought to you by the generous people of Northrop Grumman

The Powerhouse of the Universe: Stars – Every star has a story. Some are old as time, faint and almost forgotten. Others burn bright and end their lives in powerful explosions. New stars are created every day, born of vast clouds of gas and dust. Through every phase of their existence, stars release the energy that powers the universe. Journey to the furthest reaches of our galaxy and experience both the awesome beauty and destructive power of *Stars*. 26 minutes, Grades 5 and up

Black Holes: The Other Side of Infinity – Audiences will be dazzled with visualizations of the formation of the early universe, star birth and death, the collision of giant galaxies, and simulated flight to a super-massive black hole lurking at the center of our own Milky Way Galaxy. 24 minutes, Grades 5 and up

Astronaut – The exploration of space is the greatest endeavor that humankind has ever undertaken. What does it take to be part of this incredible journey? Experience a rocket launch from inside the body an astronaut. Explore the amazing worlds of inner and outer space, and discover the perils that lurk in space as 'Chad', our test astronaut, endures everything that space has to throw at him. 24 minutes, Ages 5 and up

ALSO SHOWING IN DISCOVERY DOME...

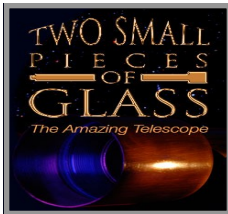

Stellarium— A collection of 40 digital images of galaxies, nebulae, and star clusters that stimulate the skies from anywhere on earth. If you're looking for a true planetarium experience, this is it!

Saturn Ring World II— Young audiences embark on the Cassini Mission to Saturn where they'll explore the gas giant and its spectacular moon, Titan. 22 minutes, Grades 2-8

It's About Time— Some day our children may travel to orbit in a space elevator. Someday we may use a time telescope to watch the Big Bang, the birth and death of a star, or an explosion of the sun. Explore these wonderful inventions from the science future as you discover the many clocks that keep time in the universe. 21 minutes, Grades 3 and up

Two Small Pieces of Glass- Examines what makes telescopes work and how the largest observatories in the world use these instruments to explore the mysteries of the universe. 23 minutes, Ages 5 to 11

Earth's Wild Ride— Immerses students in a 3-D tour of Earth's history and natural wonders. Kids roam the forest with a Tyrannosaur and take a rollercoaster ride through canyons of raging rivers and hot flowing lava—all while learning about eclipses, the ice age, Earth's water cycle and difference between the Earth and Moon. 20 minutes, Grades 2-8

IBEX—Search for the Edge of the Solar System— Join scientists as they investigate the boundary between our Solar System and the rest of our galaxy. Get an in-depth look at how NASA's interstellar Boundary Explorer (IBEX) spaceprobe collects high-speed atoms to create a map of our Solar System's boundary. 23 minutes, Grades 3 and up
