

74%

of kids say parents are the #1 influence on their decisions about alcohol.

Alcohol kills more teens than all other illegal drugs combined. To combat this, Mothers Against Drunk Driving (MADD) designed *Power of Parents*. It's a **15- or 30-minute workshop** that provides guidance to parents of teens on ways to communicate with kids about alcohol. The Learning Lamp's dedicated prevention team facilitates these workshops **FREE for schools, parents and other community groups.**
